

DOAS and Clean Air to Host CommuteSmart Webinars on November 15

On November 15, 2012, the Department of Administrative Services (DOAS) and The Clean Air Campaign will host two CommuteSmart Webinars at 10:00 am and 2:00 pm. The purpose of the webinar is to provide state HR professionals and managers with as much information as needed to fully implement the CommuteSmart program within their agency. The presentation will include the following topics:

- CommuteSmart Options
- Tailoring a CommuteSmart program for your agency
- Clean commute data and reporting
- Annual Efficiency and Service Level Survey

To call into the meeting, simply dial 855-212-0212. The meeting number is 954-202-245. A Q&A session will be held at the end of the presentation. Be prepared to ask any questions you may have.

The Georgia CommuteSmart initiative was recently established through an executive order signed by Governor Nathan Deal to encourage expanded use of commute options and flexible work scheduling for eligible employees. Empowering workers to choose alternatives to driving alone on trips to and from work is a proven workplace strategy to enhance productivity, improve morale and attract and retain talent. By expanding beyond traditional work week schedules, the program will also improve road conditions and the flow of workers and goods.

DOAS is partnering with The Clean Air Campaign to leverage their expertise and the tools and training already in place to assist agencies in implementing a CommuteSmart program that is tailored for their organization.

If you have any questions about the webinar, please contact Lettie Hernandez Ongie, Employer Program Manager for The Clean Air Campaign, at lhernandez@cleanaircampaign.org or 678-244-7728.
